

Photo Narratives for Kenya Access to Water

KE0102

We collect rainwater from our roof in this 400-liter black tank. During the rains the water overflows, so we frequently empty it into other buckets.

KE0210

It is unusual to see males like this young man fetching water. He is filling a water jug at the Miharati town dam and will use the water to wash clothes.

By Kendall Rondeau
Miharati, Kenya (1999)

KE0224

Solar panels power the pump that brings water to the black plastic water tank in the background. Solar energy is becoming more and more popular in Kenya, although the equipment is still expensive.
