

Tanzania Photo and Story Reference Chart

Directions: This chart gives the best examples of photos and stories that show water usage by Tanzanian children and young people from the Water in Africa Web site (<http://www.peacecorps.gov/wws/water/africa/tanzania/>). Be sure to read the stories carefully, because only one part of the story may be about water and children. Write down what you learn on your Research Graphic Organizer. See the graphic organizer for directions and a sample.
